We are developing a portal that will be directly connected to GOS	
not yet but will be	
Not yet. We are working towards it this year.	
Not at present time -- want GOS request/notification prior to harvesting	
When it is up it will be	
Pending	
In progress	
We are basically ready, but need to connect with the right resources in USGS to take last steps.	
Data posted to GOS manually. Working on harvesting.

as needed--much in the public domain	
We are actively working on data sharing agreements because local governments insist on them. I would prefer not to work on them.	
Most data sharing happens voluntarily. Data sharing agreements have not been actively promoted, but are encouraged if they are a condition of making data available.
